

L-783

Toilet roll holder

Lovair L783 is a mini-jumbo toilet roll holder with a viewing window and lockable cover.

The L783 is made from either AISI 304 type stainless steel in a brushed satin or mirror polished, or white painted mild steel.

Code	Finish	Material
L783C	Mirror polished	AISI 304 stainless steel
L783CS	Satin polished	AISI 304 stainless steel
L783W	White	Painted mild steel

Operation

The user is to pull toilet tissue from aperture at the base.

Refilling

1. The two-pronged key is to be inserted into the holes on the cover, and pushed down to release the latch holding the cover.
2. The cover can then be hinged down and the new toilet tissue roll can be slid over the central spindle.
3. The cover can then be closed and snapped shut.
4. The key is not needed to lock the cover.

Roll dimensions – max diameter	250mm
Roll dimensions – max width	110mm
Approx core diameter	60mm

Maintenance

The dispenser should be inspected periodically to check that no damage has occurred and that the cover can be freely opened when unlocked.

Cleaning - Stainless Steel Version

All grades of stainless steel will stain or discolour if due care and attention is not taken. The surface must be regularly cleaned to ensure a long service life of the dispenser.

Use a soft cloth or sponge with a mild solution of soapy water as part of the regular washroom janitorial routine. Do not use abrasive or cream cleaners as these will damage the surface finish.

If the dispenser is subjected to a highly chlorinated environment eg swimming pools or marine coastal locations, a further treatment, in addition to the regular cleaning as described above, is recommended by the application of a household cleaning product containing silicone.

Cleaning - White Mild Steel Version

Regular cleaning and inspection is necessary to prevent corrosion and ensure a long service life. Use a soft cloth or sponge with a mild solution of soapy water as part of the regular washroom janitorial routine. Do not use abrasive or cream cleaners as these will damage the surface finish.

If the surface finish becomes scratched or chipped, then the exposed metal should be treated with an appropriate proprietary surface finish to prevent any corrosion starting.

If further information is required, contact Lovair technical team for more detailed care guidelines.
