

## L-284

## White horizontal baby change unit

Lovair L-284 is a white moulded baby change station that is wall mounted which has a table that folds up when not in use.

### Operation

The user simply folds the table down from its upright stowed position and lays the baby on the table. The baby should be restrained using the strap attached to the table.

### Maintenance

The changing station should be inspected periodically to check the function of the gas strut and that the fastening of the strap provides a safe means of restraining the baby when the station is in use.

### Cleaning

Use a soft cloth or sponge with a mild solution of soapy water as part of the regular washroom janitorial routine. Do not use abrasive or cream cleaners as these will damage the surface finish.

**If further information is required, contact Lovair technical team.**
