bespoke sizes available– please enquire info.uk@thesplashlab.com

*Weights provided are for the non-fire rated plasterboard door range.

Installation requirements

Make sure the structural opening is at least 5mm larger than the back of frame size, back of frame size. E.G a 600 x 600mm panel size requires a 605 x 605mm hole size.

Open the panel using the budget lock key provided and place it into the aperture without opening the door.

Tighten the device via the fixing screw behind the door leaf to clamp on the back of the plasterboard (The device covers boards from 8mm to 32mm)

Prior to applying the plaster skim coat, a joint filler and scrim tape should be applied over the junction between the beaded frame and the plasterboard in order to prevent cracking of the skim coat.
