

## L-735 Paper Towel dispenser

Lovair L735 is a paper towel dispenser with a 400 – 600 sheet capacity.

The L-735 is made from AISI 304 type stainless steel and is available in either brushed or mirror polished stainless steel, or white painted mild steel.

### Operation

The user is to pull the towels from the opening at the base of the unit.

### Refilling

1. Using the key provided, cover can be unlocked and hinged forward giving access to the paper towel guides.
2. The towels can now be loaded into the guides, ensuring there is a free edge of towel available for the user to grip.
3. The capacity of the unit is approximately 400 - 600 towels  
(This is dependent on the thickness and grade of towel being used)

Max size of folded towel	260 x 115mm
--------------------------	-------------

### Stainless Steel Version

The towel dispenser is made from AISI 304 type stainless steel in either a brushed satin or mirror polished finish.

### Maintenance

The dispenser should be inspected periodically, to check that no damage has occurred and that the cover can still be opened for refilling.

### Cleaning

All grades of stainless steel will stain or discolour if due care and attention is not taken. The surface must be regularly cleaned to ensure a long service life of the dispenser.

Use a soft cloth or sponge with a mild solution of soapy water as part of the regular washroom janitorial routine. Do not use abrasive or cream cleaners as these will damage the surface finish.

If the dispenser is subjected to a highly chlorinated environment eg swimming pools or marine coastal locations, a further treatment, in addition to the regular cleaning as described above, is recommended by the application of a household cleaning product containing silicone.

## White Steel Version

---

The dispenser is made from white painted mild steel. Regular cleaning and inspection is necessary to prevent corrosion and ensure a long service life.

## Maintenance

---

The dispenser should be inspected periodically, to check that no damage has occurred and that the cover can still be opened for refilling.

## Cleaning

---

Use a soft cloth or sponge with a mild solution of soapy water as part of the regular washroom janitorial routine. Do not use abrasive or cream cleaners as these will damage the surface finish.

If the surface finish becomes scratched or chipped, then the exposed metal should be treated with an appropriate proprietary surface finish to prevent any corrosion starting.

**If further information is required, contact Lovair technical team for more detailed care guidelines.**
