

## **L-279 Waste Bin**

Lovair L-279 is a 25 litre capacity waste bin, which has the option to be wall-mounted.

The waste bin is made from AISI 304 type stainless steel in either a brushed satin or mirror polished finish.

### **Maintenance**

Typically a bin liner would be fitted inside the waste bin, which can be emptied regularly as part of the washroom cleaning routine.

### **Cleaning - Stainless Steel Version**

All grades of stainless steel will stain or discolour if due care and attention is not taken. The surface must be regularly cleaned to ensure a long service life of the bin.

Use a soft cloth or sponge with a mild solution of soapy water as part of the regular washroom janitorial routine. Do not use abrasive or cream cleaners as these will damage the surface finish.

If the bin is subjected to a highly chlorinated environment eg swimming pools or marine coastal locations, a further treatment, in addition to the regular cleaning as described above, is recommended by the application of a household cleaning product containing silicone.

### **Cleaning - White Steel Version**

The waste bin is made from white painted mild steel. Regular cleaning and inspection is necessary to prevent corrosion and ensure a long service life.

Use a soft cloth or sponge with a mild solution of soapy water as part of the regular washroom janitorial routine. Do not use abrasive or cream cleaners as these will damage the surface finish.

If the surface finish becomes scratched or chipped, then the exposed metal should be treated with an appropriate proprietary surface finish to prevent any corrosion starting.
